Jan. 18, 2024 | Issue 78

Lt. Cmdr. John C. Waldron Memorial Bridge Pierre & Fort Pierre, S.D.

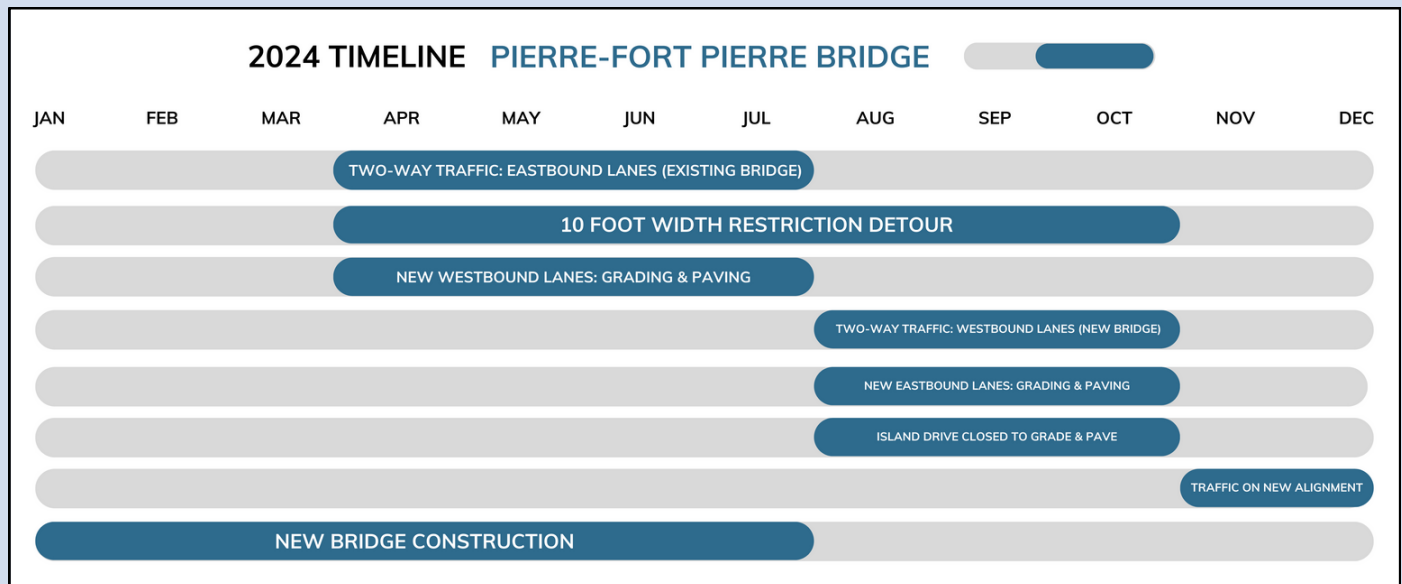

## Bridge Project Update

January temperatures and weather conditions are in full force for 2024. Facing single and negative-digit temperatures, crews are hard at work receiving and staging materials, performing routine equipment maintenance, and making as much progress as possible despite nature's seasonal challenges.

Pictured below is the current construction timeline for 2024. Notice that the two-way traffic pattern in the eastbound lanes

and 10-foot width restriction detour may go into effect again in early April, with the detour lasting through late October. As the project continues into the summer, expect to see changing traffic patterns as the team shifts to working on the new bridge's eastbound lanes.
