

# Pierre-Fort Pierre Bridge Newsletter

May 23, 2024 | Issue 87

**Lt. Cmdr. John C. Waldron Memorial Bridge Pierre & Fort Pierre, S.D.**

## Bridge Project Update

Progress on the new bridge continues as we enter the latter days of May and look towards the upcoming summer months. The final deck pours are ongoing, and crews can be seen hard at work on the westbound barrier rail. Also on track is the area separating the eastbound and westbound lanes, where workers have started drilling on the Pierre side in preparation for the raised median. And in addition to the earthwork taking place on the Ft. Pierre side, crews have begun installing storm sewer pipe.

### Traffic Update:

During the first week of June 2024, Island Drive in Fort Pierre, between U.S. Highway 14/83 and Hustan Avenue, will be closed for the construction season. Island Drive is being realigned and reconstructed with the Missouri River Bridge replacement project.

Motorists wishing to commute to and from the businesses previously served by Island Drive should utilize the intersection of Highway 14/83 and Yellowstone Street.

Island Drive is anticipated to reopen in the fall of 2024 upon completion of the new Highway 14/83 eastbound lanes of the Missouri River Bridge replacement project.

We remind all motorists, boaters, and pedestrians to stay vigilant throughout the entire construction zone, especially during the warmer seasons!
